

ACCELERATE THE DEPLOYMENT OF YOUR **WIRELESS NETWORK**

Increase your revenue and efficiency for site acquisition & colocation

As demand for reliable connectivity continues to grow, network operators need faster, more efficient ways to identify, access, and secure sites that meet a specific set of requirements. Improving the site acquisition process is essential to accelerating deployment while maximizing budget to deliver the network performance customers expect.

At Asset Market, we specialize in helping to more effectively connect willing landowners and network operators—streamlining efforts to improve coverage and capacity in communities. Layering data and analytics over digital inventory in our single platform supports you in identifying and evaluating opportunities to increase co-locations, improve site marketing, and to have a faster, smoother planning and contractual process.

Our customers have found a **50% Improvement** in time, cost & rejection rates for sites

Choose the Asset Market journey to support your needs

	AM INSIGHTS	AM INVENTORY	AM IMPLEMENT
 Product Journey	 Explore Insights	 Identify Opportunities	 Find Inventory
 LICENSE	 Secure Sites	 Plan & Deploy	 Manage Lifecycle
 AM Explore	Use advanced self-serve features to develop and execute personalized deployment plans		
 AM Guide	Engage Asset Market for industry leading, hands-on support to meet your unique needs		

Why work with Asset Market?

Current processes for site acquisition are too slow, and expensive for the high volume, low cost needs for small cell and macro cell coverage and capacity improvements. Our data-driven insights and smart platform help evaluate millions of potential locations at the click of a button
